Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-3 and 5 have been considered but are moot in view of the new ground(s) of rejection. The Applicant has amended the claims to include new limitations changing the scope of the claims, and therefore requires a new search and new consideration. A new rejection is being made in light of the amended claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Elam et al. 3890967.

4. Elam et al. teaches a device for detecting the flow of gas through at least one opening in an object, the device comprising: an inlet; a chamber having an interior; an outlet, located downstream of the chamber, and open to ambient pressure, said inlet, said chamber and said outlet being configured together for allowing passage through the device of the gas flow; a pressure displaceable member having an inner face exposed to the ambient pressure; the pressure displaceable member being a hinged member hingedly mounted along one end within chamber such that the member is pivotally displaceable about the end;

wherein the hinged member carries an indicator element cooperable with a fixed scale for indicating the magnitude of displacement of the hinged member;

wherein the chamber is expandable, and the hinged member constitutes a wall of the expandable chamber; wherein the expandable chamber including the hinged member is enclosed within a housing having an opening.
